La collezione Air porta l'alluminio nella stanza da bagno, utilizzandolo come struttura di appoggio per le basi del mobile. Altra novità della collezione sono il Top in PPL un materiale altamente funzionale perchè duttile, ipoallergenico e resistente. L'arredo bagno entra così in un'altra fascia di mercato, caratterizzata dall'uso di materiali per mobili bagno e dall'alto apporto estetico.

The Air collection brings aluminum into the bathroom, using it as a support structure for the cabinets. Another new feature in the collection is the PPL top a highly functional material because it is ductile, hypoallergenic and resistant. The bathroom furniture enters into another market segment, characterized by the use of bathroom furniture materials and a high aesthetic contribution.
